

San Francisco Dec. 28th 1872

Prof. Gray

Dear Sir

I sent a Cut of Seed to Prof. Sargent and Dr Box St. Forest Trees among them find two seedlings of what to me appears to be novel shrub? I have red berries on it - Can it be a Myrtillus that I have not seen? I think I have a No. of a new Myrtle - no fls. nor fruit - shall get both another season - if you like I'll send this - it may be you would recognize this or something else for which I mistake it in my conjecture.

I send herein a few sp.^{rs} from Colorado - some I recognize others I do not - if convenient let me know, and any thing you wish I may be able to get for you.

Enclosed see a few hasty remarks or hints relative to our bulbs &c.

Yours truly

A. Kellogg

P.S. I think I wrote to Prof. Sargent - at least intended to do so to say any thing sent him to hand over for the Cambridge Garden if you wish it.

Kellogg
